KUALA LUMPUR: A total of 97%, or 1,015 out of 1,040, communication infrastructure and equipment affected by floods have been repaired as of 10am, Communications and Multimedia Minister Tan Sri Annuar Musa (pic) tweeted on Monday (Jan 3).

"The total figure is 1,040, whereby there is an additional communication infrastructure that is affected in Jempol (Negri Sembilan)," he said.

Meanwhile, the National Disaster Management Agency (Nadma) Secretariat, in a separate statement today, said that the remaining 25 communication infrastructures were in the process of being repaired.

"This (total) is cumulative data collected from Dec 19, 2021," the statement added. - Bernama
